

**NOVITEK®**

**Four seasons of enjoyment.**

# Hop in and get soaked!

Life can sometimes be hard and it probably never gets easy but you can make it more relaxed and enjoyable with little things.

We think that one of the best ways is bathing outdoors in all four seasons. Novitek was founded with a rebellious spirit and a lofty objective: to offer well-designed and well-manufactured Finnish outdoor hot tubs at a reasonable price.

Our mission is to increase the well-being and enjoyment of our customers. Soaking in a hot tub relaxes your body and mind so you can relieve stress and sleep better. Plus, it's really fun!

Over nearly three decades in the industry, our customers have taught us what the requirements for bathing are. More than 100,000 customers have trusted us and we have been honored to bring a touch of luxury to their daily lives.

**You should hop in and get soaked too!**

**N**<sup>®</sup>  
NOVITEK

## Made for you

Your Novitek outdoor hot tub is made according to your wishes. Handmade in Finland, Novitek hot tubs are designed for northern conditions – they endure time, weather and take good care of their owner for decades. Order the best tub to fit your yard or terrace.

### SUPREME QUALITY

Novitek® outdoor hot tubs are made using the best possible materials and components. Such features as the **aluminum frame** that distributes the mass of water evenly, the American **Balboa control panel** and **ABS plastic base** make the hot tub a long-lasting and stylish companion.

### LOW OPERATING COSTS

The hot tub's **polyurethane insulation** and weatherproof insulating cover keep the water ready and operating costs low all year round.

### EFFORTLESS USE

The water of the outdoor hot tub needs to be changed only 2–4 times per year depending on the utilization rate. Thanks to **fiber filters**, a ozonator and chemicals, the water stays clean and clear for a long time.

### LOW MAINTENANCE

The inner surface of the outdoor hot tub is made of **sanitary acrylic**, which is a hard, glossy and easy-to-clean material, making the care of the surface very easy. **The composite paneling** retains its original color well, it is easy to keep clean and looks just as good after many years of use.

Bathing is not about  
technique. Making hot  
tubs is.

# Designed and manufactured for the harsh conditions of the North.

From the peaks of the arctic hills to the rugged archipelago.

Finland's extreme weather conditions have taught us to create tough and durable outdoor hot tubs.

**High capacity**  
thermal insulation.

**Carefree** and **aesthetic**  
composite siding.

**Sturdy**  
aluminium frame.

**Durable**  
synthetic base.

**Reliable**  
Balboa control panel.

**High quality**  
components.

## Customize your own outdoor hot tub.

1. Choose a suitable size

2. Choose your favorite model

3. Select the trim level

- **Essential**
- **Comfort**
- **Premium**

4. Choose a colour

5. Would you like something extra?

**Choose your extras!**

# 1 – 2. Choose a suitable size and model

Consider the location of the outdoor hot tub and the number of future bath guests.

Before buying an outdoor hot tub, you should think about the location of the future spa. Does the location limit the size of the outdoor hot tub? Another important thing to consider is the number of future bath guests. How many people mainly bathe in the pool? Sufficient space brings a more comfortable experience. The Novitek hot tub collection includes outdoor spas of different sizes, starting from 190 x 190 cm up to 275 x 230 cm.

The design of the hot tub is also important. Novitek's collections include pools from simply designed models to more versatile design options. There are upright seats, lounge seats and their combinations to choose from. In each size class, you will find a pool equipped with either just seats, one or two lounge seats. We always recommend dry fitting the hot tub before purchase. This way you can make sure that, for example, the seat depth is just right for you.

## 4. Choose your colour

### Comfort & Premium

You can choose the colours of the shell (excl. Ylläs) and cabinet.

## 5. Choose your accessories

### Clim8Zone heat pump

- Energy efficient way to keep the water hot, providing savings.
- Ability to heat and cool the water in the spa.
- Ability to function at low ambient air temperatures down to  $-20^{\circ}\text{C}/-4^{\circ}\text{F}$ .

### Sink paneling

- With this paneling, the hot tub can be sunk into a terrace without separate maintenance hatches built into the terrace.
- The sink paneling can be placed at most 40 cm from the bottom of the hot tub to the top of the terrace.
- However, please note that you need to leave at least 50 cm of space by each straight wall of the hot tub to allow for enough room for maintenance.

### ControlMySpa™

- The ControlMySpa™ remote control makes the use of your hot tub even easier and more flexible.
- The app connects you to your hot tub from a mobile device wherever you are.
- The app allows you to adjust the temperature, set up schedules, control the lights and receive notifications, among other things.

### Supplementary heater

- In colder latitudes and large hot tubs, the supplementary heater is an excellent accessory.
- The supplementary heater heats the water faster to the set temperature and maintains the temperature in even the harshest frost.
- The 3 kW supplementary heater is standard equipment only in the Ylläs model of the Exclusive product family.
